

Primary Care for People Who Inject Drugs: HIV, Hep C, STDs and more

Todd Korthius, MD MPH
Associate Professor of Medicine,
Oregon Health and Science University

John Nusser, MD
Family Medicine / Obstetrics
PeaceHealth, Vancouver, WA

Jim Winkle, MPH
Training Coordinator
Oregon AETC

Friday, July 26
10am – 2pm

Adapt

621 West Madrone, Roseburg
Room #132

People Who Inject Drugs (PWIDs) often delay seeking health care and underuse healthcare services overall, despite bearing a greater burden of infections from HIV and Hepatitis C. Engaging with primary care is an opportunity for PWIDs to reduce their risk of illness and death, as well as begin a pathway to recovery from substance use disorder.

Primary care clinicians and other health professionals are welcome to attend this free training event, which will improve the ability of attendees to:

- Engage and build rapport with PWIDs
- Treat Opioid Use Disorder in primary care
- Discuss cases

Lunch will be provided for all attendees who register.

Register here: https://mwaetc.org/event?ER_ID=37959

Free CME : This event is approved for 4 American Academy of Family Physicians (AAFP) prescribed credits.
