

Empower™ is an easy to use online advance care planning (ACP) platform. ACP can be useful whether you are healthy or have existing health conditions. Care planning helps your family and doctors understand your care preferences in case of an emergency or if can't speak for yourself.

Empower guides you through the entire ACP process with step-by-step instructions and information to help you understand care choices and make informed decisions. It automatically generates advance directive documents based on your answers and allows you to easily sign and share them electronically with your family and doctors.
