Planning for my future medical care lifted a big burden off my kids. I could see the relief in their faces after we finished the Iris Plans process.”

WELCOME TO IRIS

We manage the Advance Care Planning program that is included in your health plan.

We will help you start the conversation about:

What's important to you?

How and where do you want future care to be delivered?

Who needs to stay informed?

What happens as things change over time?

“ Advance Care Planning helped me understand what I want out of my healthcare. It also opened my eyes to things I never knew I should think about before these decisions.”
