

STEP-WISE APPROACH TO INITIATING HEPATITIS C VIRUS (HCV) TREATMENT IN PRIMARY CARE SETTINGS

STEP 1: PATIENT SCREENING

Testing Recommendations for HCV Infection <https://www.hcvguidelines.org/evaluate/testing-and-linkage>

<i>Universal Screening</i>	All adults once per lifetime & all pregnant women once per pregnancy
<i>One-Time Screening</i>	Under 18 with increased risk of HCV infection or exposure
<i>Periodic Repeat Screening</i>	Offered to all persons with increased risk of HCV infection
<i>Annual Screening</i>	Recommended for persons who inject drugs, HIV-infected men who have unprotected sex with men, men who have sex with men taking pre-exposure prophylaxis (PrEP)

STEP 2: DIAGNOSTIC TESTING

Order HCV Antibody with Reflex to RNA Testing

Interpretation of Results of Tests for HCV infection <https://www.cdc.gov/hepatitis/hcv/labtesting.htm>

- If HCV Antibody is non-reactive, then no further action required
- If HCV Antibody is reactive, but HCV RNA is not detected, then no further action required in most cases
- If HCV Antibody is reactive, AND HCV RNA is detected, then proceed to step 3

STEP 3: PRE-TREATMENT ASSESSMENT

Recommended Assessments Prior to Starting DAA therapy <https://www.hcvguidelines.org/evaluate/monitoring>

<i>Rule out Decompensated Cirrhosis</i>	FIB-4 score; CTP score	If hepatic complications present, consult with a hepatologist, gastroenterologist, or infectious disease specialist.
<i>Determine baseline details of HCV infection</i>	HCV viral load	Genotyping recommended for cirrhotic patients if not prescribing a pangenotypic DAA regimen.
<i>HBV & HIV Status</i>	HBsAg; HBsA; HBcA	Recommended that specialist be consulted prior to treatment for patient with documented HIV or HBV coinfection
<i>HCV Treatment Experience</i>	Patient history	>4 weeks of prior treatment consult with a hepatologist, gastroenterologist, or infectious disease specialist
<i>Medication Review</i>	Med reconciliation; drug-drug interactions	University of Liverpool free interaction checker https://www.hep-druginteractions.org/
<i>Laboratory Testing</i>	CBC, ALT, AST, eGFR	Complete within three months of treatment initiation. Pregnancy testing also recommended.
<i>Comorbid conditions</i>	Patient history	Treatment is not medically appropriate for patients with a life expectancy of less than 1 year.

STEP 4: DIRECT ACTING ANTIVIRAL (DAA) DRUG SELECTION

Treatment Naïve Patient Without Cirrhosis <https://www.hcvguidelines.org/treatment-naive/simplified-treatment>

- Glecaprevir (300 mg) / pibrentasvir (120 mg) (Mavyret) to be taken with food for a duration of 8 weeks
- Sofosbuvir (400 mg) / velpatasvir (100 mg) for a duration of 12 weeks

Treatment Naïve Patient With Compensated Cirrhosis

<https://www.hcvguidelines.org/treatment-naive/simplified-treatment-compensated-cirrhosis>

- **Genotype 1-6**
Glecaprevir (300 mg) / pibrentasvir (120 mg) to be taken with food for a duration of 8 weeks
- **Genotype 1, 2, 4, 5, or 6**
Sofosbuvir (400 mg) / velpatasvir (100 mg) for a duration of 12 weeks
- **Genotype 3 (requires baseline NS5A resistance-associated substitution (RAS) testing)**
Without Y93H: Sofosbuvir (400 mg) / velpatasvir (100 mg) for a duration of 12 weeks
With Y93H: Refer to HCV guidelines for treatment recommendations.

STEP-WISE APPROACH TO INITIATING HEPATITIS C VIRUS (HCV) TREATMENT IN PRIMARY CARE SETTINGS

STEP 5: COORDINATE CASE MANAGEMENT

Case Management Requirements of Oregon Health Authority (OHA)

All members with coverage through Oregon Medicaid or a CCO (such as UHA) must be offered case management at the start of HCV treatment with goals including:

- * Adherence to medication regimen
- * Mitigation of barriers to treatment
- * Support for patients and provider
- * Compliance with viral load testing
- * Collection of data for state program evaluation
- * Prevention of treatment interruption or delay

Umpqua Health Alliance

The UHA Hepatitis C Case Management Referral Form must be completed and faxed to 541-229-8081
<https://www.umpquahealth.com/case-management/>

STEP 6: INITIATE PRIOR AUTHORIZATION REQUEST

Prior authorization for DAA treatment will be required by most insurance plans.

- UHA prior authorization criteria and the specific Hepatitis C Prior Authorization Form are available online: <https://www.umpquahealth.com/pharmacy-services/>
- Prescriptions must be sent to UHA's specialty service, MedImpact Direct Specialty Hub, by faxing their prescription form to 888-807-5716. Link to form: <https://www.medimpactdirect.com/static/MedImpactDirect-Referral%20Form.pdf>. The medications will be delivered to the member via mail.
- NOTE: Commercial insurance plans and Medicare Part D provider may have different approval requirements.

STEP 7: FOLLOW UP TESTING

Monitoring Patients During Treatment

- Patients taking diabetes medications: monitor for hypoglycemia
- Patients taking warfarin: monitor INR for subtherapeutic anticoagulation
- No laboratory monitoring is required for other patients during treatment

Post Treatment Testing (12 weeks after therapy completion)

- SVR & hepatic function panel: Completed to confirm HCV RNA is undetectable and transaminase normal.
 - SVR achieved: No liver-related follow up required for noncirrhotic patients who achieve SVR: advise alcohol abstinence and counsel regarding risk behavior avoidance
 - SVR not achieved: Refer to specialist to evaluate re-treatment option

Hepatitis C Case Management Referral Form

Fax Form to: 541.229.8180

****All fields are mandatory and failure to complete will result in the requesting being canceled****

Patient Name:	Prescriber Name:
Member ID #:	Prescriber NPI #:
Patient DOB:	Clinic Name:
Treatment Requested:	Office #: Fax#
Treatment Length:	
Treatment Status:	Prescriber Contact:

The following information is required by Oregon Medicaid to be considered for treatment.
Please attached related documents.

Within the Last 6 months:			
Office Visit:	Date:		<input type="checkbox"/> Attached
HCV RNA Viral Load:	Date:	Value:	<input type="checkbox"/> Attached
HBV Status:	Date:	Result:	<input type="checkbox"/> Attached
HIV Status:	Date:	Result:	<input type="checkbox"/> Attached
Liver Fibrosis:	Date:	Result:	<input type="checkbox"/> Attached
Expected survival from non-HCV associated morbidities more than one 1 year?			<input type="checkbox"/> No <input type="checkbox"/> Yes
Liver Transplant Status			
Within the last 3 years:			
HCV Genotype:	Date:	Result:	<input type="checkbox"/> Attached
Your patient has been made aware of the Case Management Referral:			<input type="checkbox"/> No <input type="checkbox"/> Yes

Once all information is received our case management team will reach out to the patient.
When our assessment is complete your office will be notified of next step.

Patient DOB:	Clinic Name:
Pharmacy Name:	Office #: Fax#
Pharmacy Phone:	Prescriber Contact Person:
Hepatitis C Drug Requested:	Treatment Length:

Past Treatment History

Dose the patient have a history of HCV treatment? ☐ No ☐ Yes Drug Regimen:
If past treatment failed, was adherence with medication a concern? ☐ Yes ☐ No ☐ Not sure

Patient's HCV Genotype (drawn <3 years):	HCV RNA Quant (drawn <6 months): Date:
---	--

Does the patient have HIV? ☐ No ☐ Yes Does the patient have Hepatitis B? ☐ No ☐ Yes

Other Extra Hepatitic Manifestations?

Stage of Fibrosis and method of testing (ie Biopsy, Fibroscan, Fibrosure, Fibroscan, Fibrospect, Clinical Diagnosis):	Date:
---	-------

Child-Pugh Score: Cirrhosis Status: ☐ Compensated ☐ Decompensated ☐ Non-Cirrhotic

Related to Liver Transplant? ☐ NO ☐ Yes Expected survival from non-HCV associated morbidities more than one 1 year? ☐ NO ☐ Yes

Case Management: Oregon Medicaid requires all members being treated for Hepatitis C to be involved in adequate case management to ensure medication compliance and optimal chances for SVR success. Does your patient agree to be followed by Umpqua Health Alliance Case Management? ☐ No ☐ Yes

**** Umpqua Health Alliance recommends all prior authorizations to be submitted with supporting medical records for a faster and more thorough review.****
