Advantage Dental 
From DentaQuest

MAKE BRUSHING FUN!

- Shop for dental supplies together and let them pick out their own toothbrush and flavor of toothpaste
- Add some music to your brushing routine
- Create a reward system and reward good brushing habits
- Make brushing a family affair

VISIT THE DENTIST

Even if you do not see any dental problems, bring your baby to the dentist by their first birthday.

The dentist can:

- Check to make sure that teething is normal
- Teach you how to care for your child's teeth as they grow
- Answer your questions about fluoride and Xylitol

START BRUSHING YOUR CHILD'S TEETH WITH THE VERY FIRST TOOTH

Brush your child's teeth twice a day using a soft bristled toothbrush and a "smear" of fluoride toothpaste. When your child is two years of age or older, use a "pea" size amount of fluoride toothpaste (see photos below).

Under 2 years = Smear

2 years and older = Pea sized

Each family member needs to have their own toothbrush.
